Problem Statement: Vegetation Management

TSNPDCL (Telangana)

In some areas of DISCOM, overhead lines are passing through forest area wherein vegetation on the OH lines are causing frequent interruptions. DISCOM officials are able to check the vegetation encroachments only during regular maintenance. Therefore, DISCOM is interested to carry out the assessment of vegetation encroachment with integration of IT systems such as Image based Vegetation Management. Past 1 year data is available and any other relevant information if required would be provided by DISCOM to arrive at a solution for the area mentioned in the problem.
